

Introducing

MENINGITIS Plus Panel

Ultra Rapid Simultaneous Detection of

Viruses:

- Human cytomegalovirus
- Epstein-Barr virus (EBV)
- Human Adenovirus
- Herpes Simplex Virus 1 (HSV-1)
- Human Parvovirus B19
- Human Parechovirus
- Herpes Simplex Virus 2 (HSV-2)
- Varicella Zoster Virus (VZV)
- Enterovirus
- Human Herpesvirus 6 (HHV-6)
- Human Herpesvirus 7 (HHV-7)

Bacteria:

- Haemophilus influenzae
- Neisseria meningitidis
- Streptococcus pneumoniae

Service Code: MPP_01

Primary Sample Type: CSF

Other Sample Types: EDTA Blood/Biopsy/Body Fluids

Methodology: RT-PCR | **TAT:** 24-48 Hrs

Do NOT use as a replacement for CSF bacterial and/or fungal culture and Cryptococcal antigen testing for at-risk patients. A negative result does not exclude a diagnosis of meningitis or encephalitis due to infection.
