10 Allergens

(A0345)

Approximately 20–30%

of India's population suffers from at least one allergic disease.

Early diagnosis and proper treatment can arrest disease progression.

Quantitative measurement of allergen specific IgE by using ImmunoCAP helps in different stages of patient management.

» ImmunoCAP: Clinical Highlights

- USFDA approved test & WHO calibrated method
- Provides true quantitative results for accurate decisions
- Can discriminate between atopic & non-atopic allergies
- Test validated in 135 clinical trials and 60,000 patients
- High sensitivity and specificity - more than 90%

Test Code	Test Name
A0345	Allergy Panel (Any 10 Allergens)
