- Sonio Diagnostics' robustness has been confirmed by an accuracy rate above 95% for the top-7 diagnoses*. This clinical study was carried out on a large patient database suffering from a rare illness and representative from real-life phenotype variability.
- Provides satisfactory performances on atypical rare diseases, even when the phenotype only partially corresponds to what is described in the literature. In the fetopathology database used for validation, half of the anomalies found were atypical.
- Leverages AI to support clinical expertise and go beyond the capabilities of the human brain to provide unique clinical value. It is able to manage 3²⁰⁰ datapoint combinations in real time to guide clinicians towards the right diagnosis.
- Sonio Diagnostics takes into consideration multiple types of data: echographic visible signs, medical history, risk factors, and genetic information.

*Using only visible signs and medical history known prior to the diagnosis, Sonio displayed the correct diagnosis in the top-7 recommendations, 95% of the time.

Hear from **Top Indian** fetal medicine **experts**

Sonio is Giant in Syndromic Identification.

Dr. Ashok Khurana

Emeritus Mentor - SFM

SONIO is an intelligent guide to difficult fetal issues. It helps unravel the puzzles of complex perinatal issues in simple dummy steps and provides a virtual encyclopaedic assistant at the click of a few keys.

Great effort by the creators to make our life simple.

Dr. Chander Lulla

Head - USG Dept., Jaslok Hospital, Mumbai

AI in fetal imaging helps to save time, improve accuracy of diagnosis, save on the cost of testing by limiting the panel, helps assess teratogenicity of inadvertent medication. AI based practices are the future of fetal diagnosis and therapy. Future is now here...

Dr. Chinmay Umarji

Secretary - SFM, Greater Pune Chapter

SONIO has improved my diagnosis & widened the spectrum of getting an unseen and unheard disease in my differential diagnosis helping me to take decision about appropriate further testing and able to give justified logical answers to my referring colleagues with ultimate benefits to my patients.

Dr. Jitendra Sahu

Secretary - SFM, Vidarva Chapter

We hope
SONIO will be a trusted companion
to assist your **Prenatal Scans**
